

BRAINSTORM WITH NOVA

One starting point. Better possibilities.

Bring an idea, a problem, or something that already exists. Nova, your guide, brings in the right experts, helps you describe the idea clearly, and shows you what deserves a closer look.

⚡ Start in minutes

🛡 No signup to begin

🗨 Four free scenarios

🚀 Becomes a project when ready

Start from where you are

You do not need a polished invention.

A new idea

A sentence is enough. Nova helps you say how it works and what is different.

A problem to solve

Start from the problem, before you have a solution in mind.

Something that exists

A product or process, a website, a patent, a template, or an earlier brainstorm.

A challenge or programme

A science fair, a hackathon, a student assignment, or a grant application.

No idea yet? Give a topic. Cora suggests five ideas that go past what exists today, each with its sources.

Samples from real brainstorms

Each with its Idea score and what is still open.

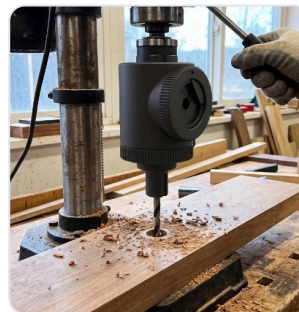

URBAN CYCLISTS 81% idea

Folding Bicycle Helmet

A certified helmet that folds flat enough to fit a laptop sleeve. The brainstorm chose sliding, overlapping plates as the main design.

STILL OPEN

How small it folds, and its impact numbers.

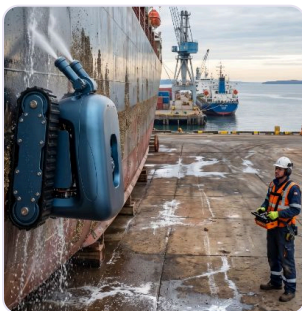

WOODWORKERS 83% idea

Chuck-Mounted Optical Depth Indicator

A battery-free drill accessory. A ring of light on the work shrinks to a point as the hole reaches its depth.

STILL OPEN

How far the probe can travel, and accuracy at high speed.

SHIPPING FLEETS 81% idea

Autonomous Underwater Cavitation Crawler

A crawler that cleans ship hulls with tiny bubbles, without scraping and without a dry dock.

STILL OPEN

Grip on non-magnetic hulls, and wear on the hull coating.

COASTAL FARMERS 78% idea

Triboelectric Fog Harvesting Netting

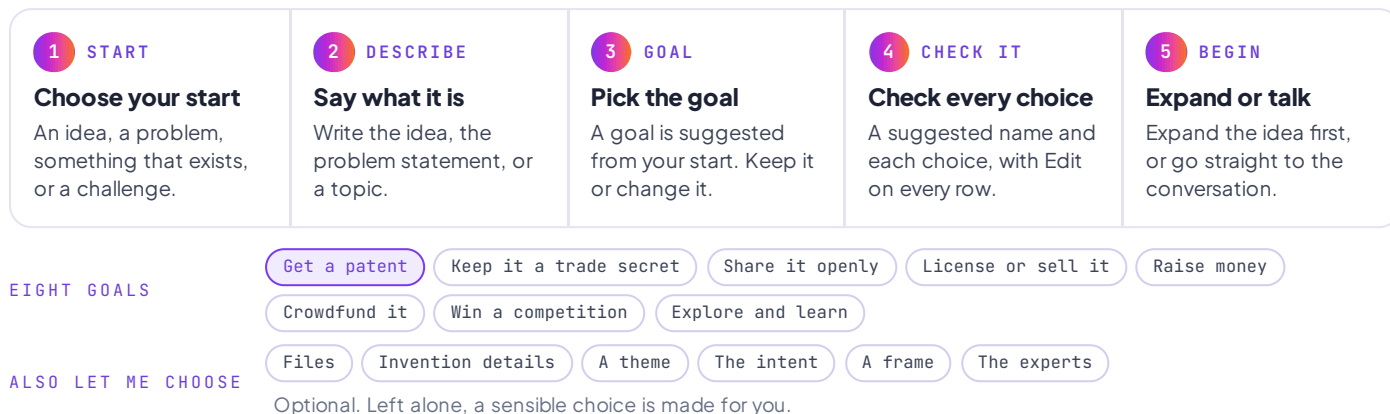

Netting whose fibres build a static charge in the wind to pull more water from fog, with no power.

STILL OPEN

Whether the charge holds when the net stays wet.

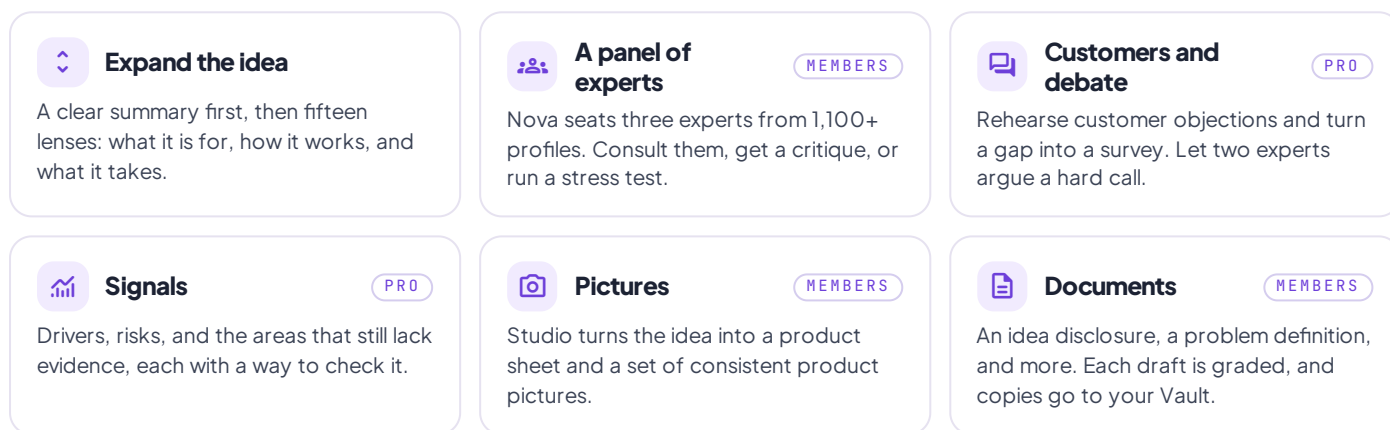

How a new brainstorm starts

One question per page. Suggestions you confirm or change.

Inside the workspace

Your idea, its record, and the team stay together across sessions.

PIVOT: change direction, keep the work

When the evidence says the angle is wrong, start a new scenario. The old one stays readable.

P Pause

Review what works, what is undecided, and what conflicts.

I Inspect

Go through the record and mark what to keep or leave.

V Verify

Sort the requirements by importance and confirm them.

O Orient

Write the new direction, its title, and its opening question.

T Transition

Review the preview, then create the new scenario.

WHEN THE IDEA IS READY · YOUR SCENARIO

The idea, goal, theme, frame, expert team, assumptions, evidence, and next tests.

BECOMES AN IPGURU PROJECT

The work carries into the project. You review every field, then begin the journey to a filing-ready patent.

Bring the rough idea. Leave with a clear one.

Start free with Nova. No signup is needed until there is something you want to keep.

ipguru.ai/brainstorm.html

Nova gives an early read on questions such as patentability. It is not legal advice and does not replace a full prior-art search. Samples are brainstorming made on IPGuru. The Idea score shows how fully an idea is described.
