

IPGuru.ai

Build the infrastructure *for the next inventor economy.*

An AI SaaS platform that turns raw ideas into robust inventions, filing-ready patent applications and documented trade secrets, helping individuals, founders, students and SMEs protect IP globally.

A franchise model launches locally through brands such as invent.sg.

Christopher Jackson, Founder & CEO • **+65 8363 6165** •

Formal employment is being rewritten

AI, slower hiring, and workforce redesign are changing how people build careers - and how companies source innovation.

New graduates, retrenched professionals, and smaller teams need a practical route to create economic value from what they know. Even elite students now turn down finance, tech and consulting offers to build ventures of their own.

IPGuru makes reinvention productive: discover an idea, prove it, build it and protect it.

22%

of today's formal jobs are expected to be created or displaced by 2030

39%

of workers' core skills are expected to change by 2030

170M / 92M

jobs created / displaced in the WEF employer model

THE CONCLUSION

Workforce disruption is creating a new class of inventors. IPGuru gives them a practical path from experience to protected products and companies.

Independent inventors are the market patent systems miss

Published PCT applications are overwhelmingly institutional. Companies, universities and public research organizations have funding, process and counsel.

For most independent inventors, the process never starts. The idea is not structured, challenged or documented, and it disappears.

The largest untapped market is the promising idea that fades before it becomes an invention.

89.1%

companies / business sector · in most countries largely foreign IP protected locally

5.6%

universities / educational institutions

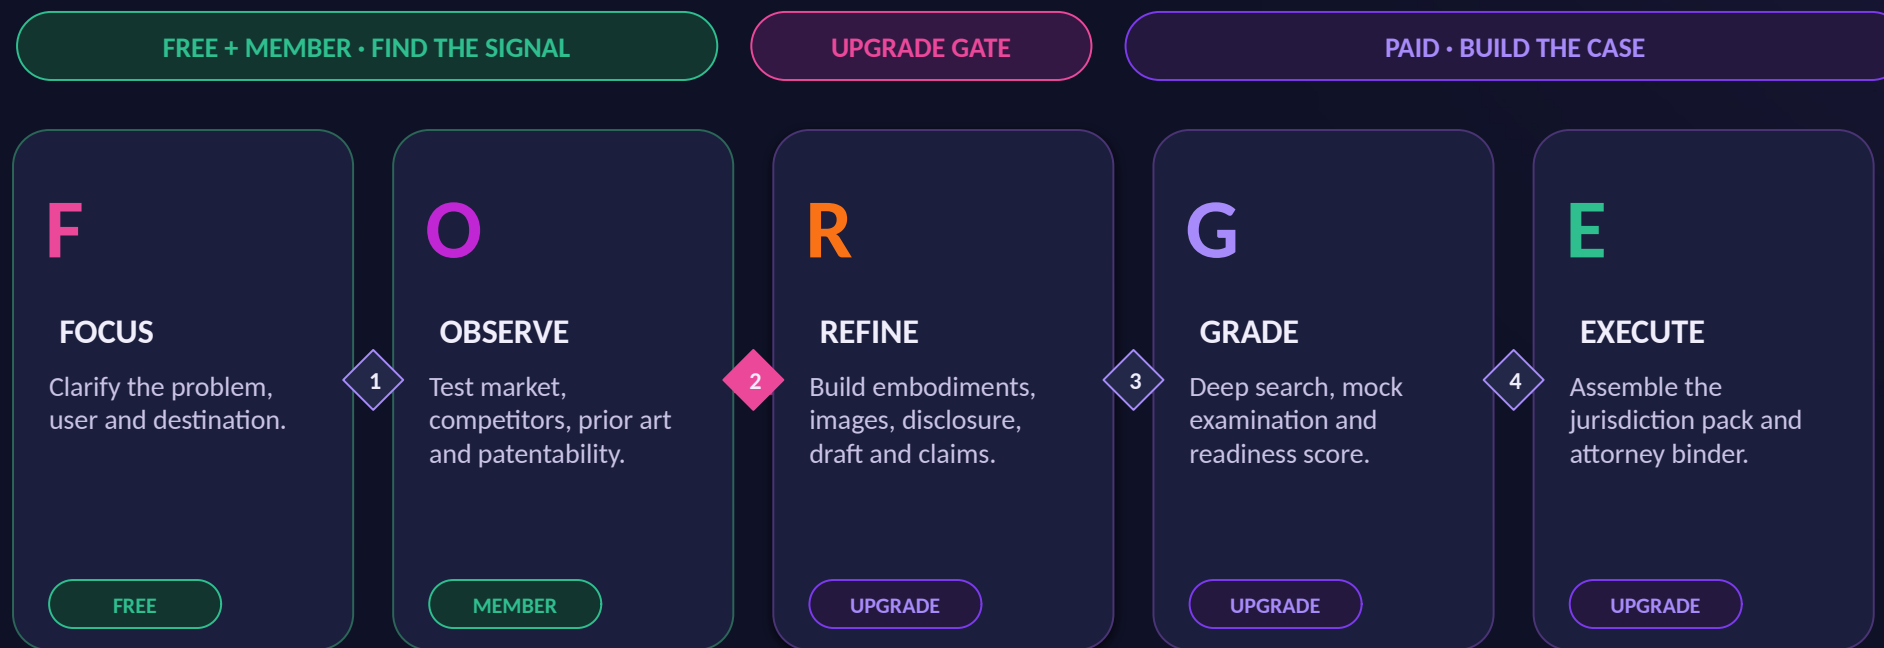

1.8%

government + public research organizations

3.5%

individuals and SMEs · the segment IPGuru intends to double and lead

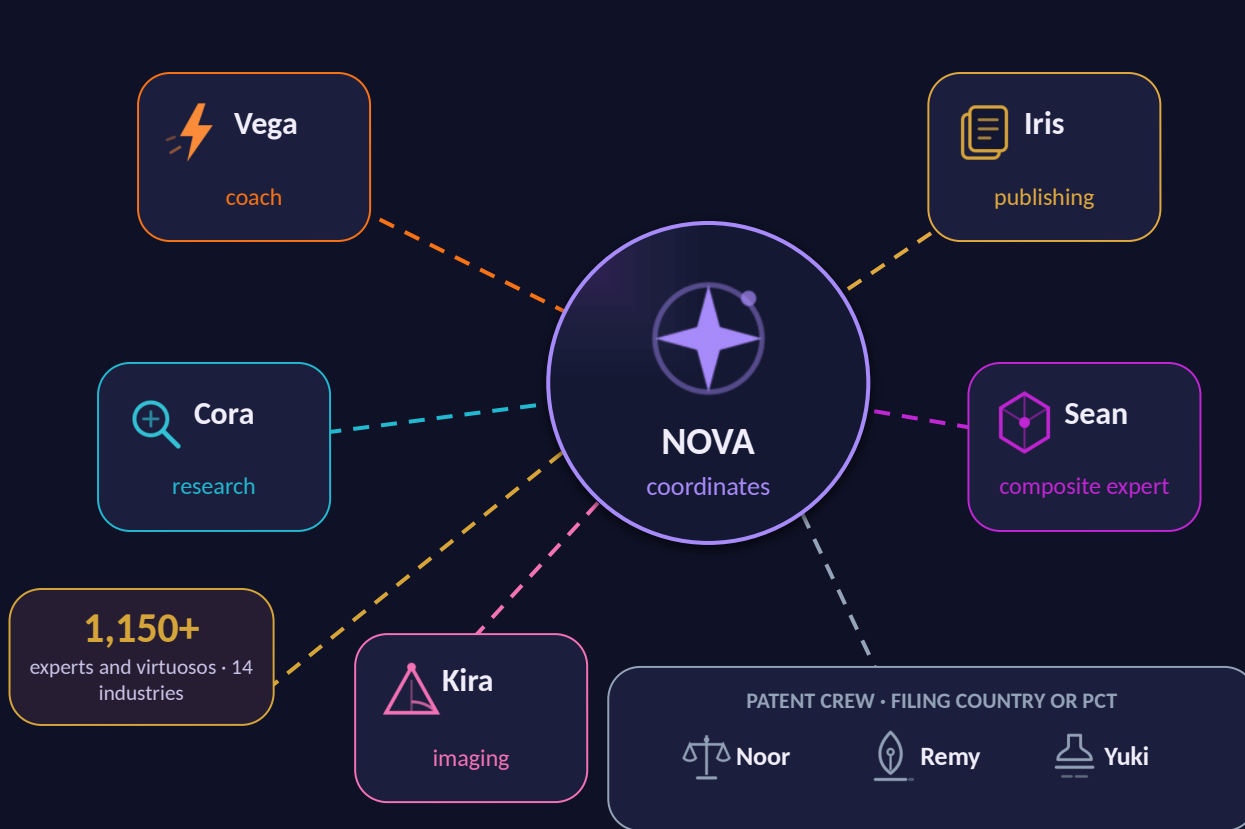

FORGE is IPGuru's proprietary invention methodology

Every gate can loop backward. Patent and trade-secret destinations run end to end today; crowdfunding, open source, grant and product-iteration paths follow.

IPGuru's five-phase system sequences agents, evidence, gates and deliverables into a repeatable invention process, grounded in 250+ million patent records.

Nova composes the right crew for every idea

One conversation. Just Nova, Synthesis mode (Nova consolidates), roundtable mode with everyone, or one expert open in the sidebar.

Six named agents, six perspectives

Nova coordinates Vega, Cora, Iris, Kira and Sean. Each has a distinct objective and point of view. Use a unified synthesis, hear the roundtable, or work with any one in the sidebar.

Patent team by filing route

The PCT variant serves every market from day one. Country-specific variants activate as national filing support comes online.

1,150+ experts and virtuosos

Coverage across most industries, technical domains and job roles. Experts can stay in character or respond as practitioners, bringing the right person into the exact situation.

Dynamic composite

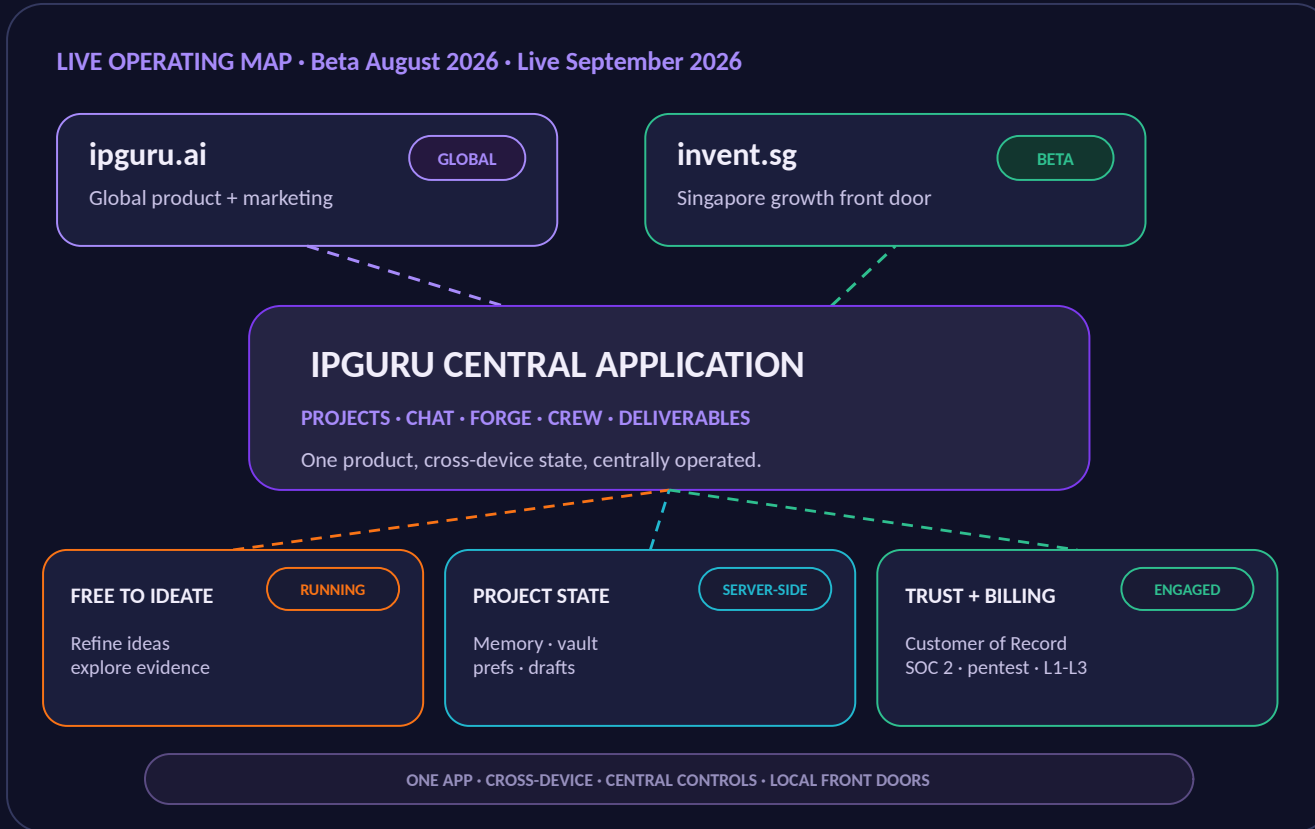

Sean is composed dynamically from the idea's domains, industries, technologies, user context and commercialization path.

Free starts it. Members validate. Projects deliver.

FREE US\$0 Focus is free for everyone, across unlimited ideas Brainstorm with Nova · idea capture · first concept images · capped credits · watermarked outputs · no card			
INVENTOR MEMBERSHIP UNLOCKS OBSERVE ANNUAL SAVES 20%	MEMBER · US\$9 / mo Unlocks Observe + the Studio 3 expert perspectives · sidebars 20% off first project, 5% later	PRO · US\$18 / mo Everything in Member Higher Studio and search allowances For steady multi-idea exploration	MAX · US\$36 / mo Everything in Pro Maximum allowances For the heaviest exploration
	PROJECT TIERS ONE-TIME NO MEMBERSHIP REQUIRED	BRONZE · US\$399 3 expert slots Refine, Grade, Execute Filing pack	SILVER · US\$699 7 expert slots Deep search + patent advisor More cycles
		GOLD · US\$999 20 expert slots Goal / Success Loop Virtual Inventor	

Membership gates validation and exploration, never a purchased build. Any project purchase unlocks everything for that project.

Live product. Singapore beta. Enterprise controls.

Operating-product map · live controls and server-side state

Product + site in production

The central app and marketing site are live; the Singapore beta opens through invent.sg.

Free to ideate

Anyone can brainstorm and refine an idea with capped usage, worked examples and no credit card.

Central app, cross-device state

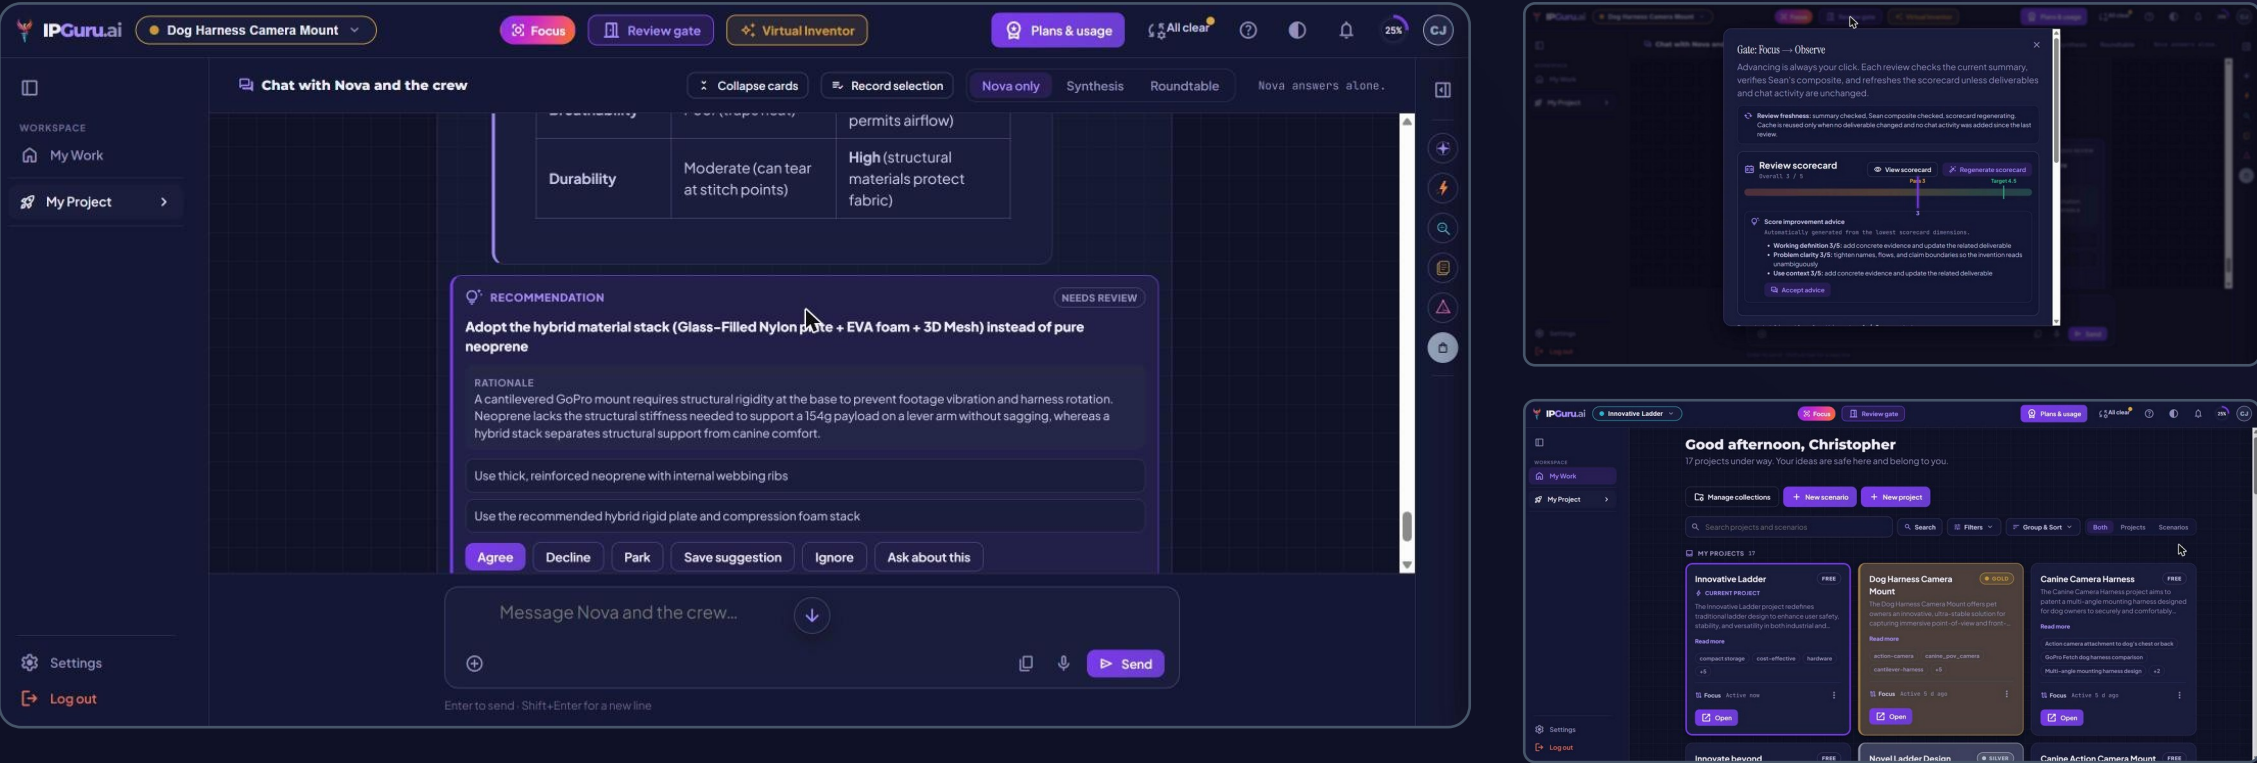

Projects, preferences, drafts, memory, and vault state live server-side behind the central API.

Trust program engaged

SOC 2, penetration testing, corporate insurance, and centralized billing are in motion.

A guided conversation, not a prompt box

Live product, July 2026. Left: Nova and the crew turn evidence into decisions you approve. Right: the Focus to Observe gate scorecard, and the cross-device project workspace.

Attorney AI improves practice. IPGuru expands demand.

Four moats compound around the invention engine

EXPERT LIBRARY

- 1,150+ expert and virtuoso agents
- 789 domain experts · 355 virtuosos
- Industries, domains, job roles
- Composable into any crew

PROMPT SYSTEM

- Prompt concatenation library
- Persona, action and phase contracts
- Compiled per agent and jurisdiction
- Model-portable by design

PRIOR-ART SEARCH

- Semantic search · 250M+ patents
- CN, JP, KR, DE, FR translated
- Grounded, citable evidence
- Hands-on search and watch

PROPRIETARY METHODS

- FORGE and PIVOT methodologies
- Gates, scorecards, mock examination
- Frames library per project
- Deliverables versioned and scored

Running on the Corvair Knowledge Substrate under commercial licence: project memory, secure vault and grounded knowledge, accumulated per customer.

Global access compounds through ten market engines

2026 · ENGLISH BASE

- 18 organic paid projects
- Global PCT, Singapore and India
- SG + PCT Sep · India Dec
- Founding cohorts, unpaid by design

2027 · SCALE

- The English base compounds
- Australia Jan · USA Feb
- UK, Europe, Japan and Korea in 2027
- The language programme begins

2028 · LOCALIZATION

- Chinese, German, French and Spanish blocs
- A licensed partner opens China
- The education engine scales
- Monthly EBITDA turns positive

2030 · GLOBAL PLATFORM

- 60,000+ direct projects
- 115,000+ active members
- US\$33M+ revenue
- US\$9.5M+ membership revenue

Management model, not a forecast. 5% conversion; per-market growth tapers with maturity. Mission: ≥25% market share by Year 5 and 2× independent-inventor filings per capita in 10 years.

Singapore is the launchpad - not the finish line

#5 in the world

Global Innovation Index 2025 · #1 in Asia-Pacific.

SIPS 2030

A whole-of-government strategy to make Singapore an intangible-assets hub.

369,500 SMEs

99.6% of enterprises; a dense, reachable beta and education market.

Only 14% local

Just 1,898 of 13,421 filings came from locals - the exact participation gap IPGuru targets.

Company-franchise lab

One compact market proves pricing, conversion, support, events, referrals, and compliance.

Regional launchpad

Runs the 2026 launch system for India, Australia and the USA; anchors PCT, Europe, UAE and China partner tracks in 2027.

Sources: WIPO GII 2025; IPOS SIPS 2030 & statistics 2024; SingStat 2025.

invent.sg opens the playbook; India, Australia and the USA launch in 2026.

Innovation education becomes the largest growth pillar

COURSEWARE

- FORGE as curriculum
- Courses US\$149 · cohorts US\$499
- Instructor licences + certification
- SkillsFuture-aligned (planned, partner)

INSTITUTIONS

- Institutional licences US\$45k / yr
- Institution-run: own GCP / AliCloud
- Faculty, staff, students and alumni
- University sets internal pricing

2027 TARGETS

- 20 institutions: 2 SG · 8 India · 2 AU · 8 USA
- 8 certified independent providers
- 1+ hackathon per market per year
- Grant-writing expansion ships 2027

THE EDUCATION ENGINE

- US\$1.0M FY27 → US\$8.8M FY30
- Largest pillar by FY30
- Second-tier TTO self-service pull
- US\$180k FY27 build budget

Education build: 20 / 45 / 60 / 120 institutions FY27-FY30 (pilot cohort Q1-2027) plus courses, cohorts, instructor licences and provider certification; FY27 budgets cover curriculum development, the grant-writing feature and rollout support. Source: the company financial model.

Spinning out of Corvair as an independent company.

Corvair Pte. Ltd. (Singapore)

100% owner during formation · Singapore governance · transition sponsor

Independent IPGuru company

Owns product · brand · customer contracts · pricing · franchise economics

Corvair Knowledge Substrate

Memory · secure vault · grounded knowledge through a commercial service licence

Cloud Hosting & Customer Billing

Corvair-hosted CKS · cloud and AI · Customer of Record billing · L3 support by commercial agreement

Strategic options

Initial financing

Post-money SAFE in the spin-off company; proceeds and milestones stay with IPGuru.

Spin-off completion

Move IP, contracts and team into the new company; retain Corvair services by agreement.

Strategic sale

Sell IPGuru without transferring unrelated Corvair products, liabilities or operations.

Continuity

IP register · standalone accounts · assignable contracts · data map · intercompany SLA

• Prove your idea for free. Pay only when it is worth protecting.

Inventing should be *for everyone*

IPGuru takes you from the spark of an invention to a complete, file-ready patent package through one guided conversation. No patent training required. A crew of AI colleagues does the work, and shows you why.

Whether you are starting from scratch or improving a product you already have, IPGuru helps you pursue the goal that matters: a patent, open source, a science fair, brainstorming, a trade secret, crowdfunding, licensing, or investment.
