

IPGuru.ai

Turning ideas into protected, funded, teachable innovation.

A spin-off of Corvair Pte. Ltd., Singapore

Live today at ipguru.ai and invent.sg

Commercial go-live 12 September 2026

Most good ideas die before anyone finds out if they were good.

The professional work before a patent or a grant is what nobody can afford. IPGuru does that work: one guided conversation producing a documented, examinable file.

■ Companies 89.1%
■ Universities and government 7.4%
■ Natural persons 3.5%

US\$15–30k

What an attorney quotes to prepare an idea, before a single line of a draft exists.

~US\$70

The USPTO micro-entity filing fee. Cost is not the barrier. The work in front of it is.

22%

Of formal jobs created or displaced by 2030. Graduate unemployment and workforce disruption are creating a new class of inventors who need protection.

ONE METHOD, MANY WAYS IN

Any starting point becomes a protected, examinable invention

IT STARTS WITH

- **A product you already sell**
What is defensible, and what have competitors claimed around it?
- **A blank page**
Brainstorming is free. Unlimited ideas, no credit card required.
- **A problem that will not go away**
Work back from the pain to a solution worth owning.
- **Any patent, yours or a competitor's**
Extend it, design around it, or find the gap it left.
- **A research output or thesis**
The university path, and the grant that follows it.
- **A classroom assignment**
Marked coursework with a real deliverable.

THE FORGE METHOD

FOCUS

Clarify the idea: scope, users, what has been tried.

OBSERVE

Validate: market, competitors and prior art across 250M+ patents.

REFINE

Claims, description and figures, worked for your jurisdiction.

GRADE

Mock examination, scored against a rubric.

EXECUTE

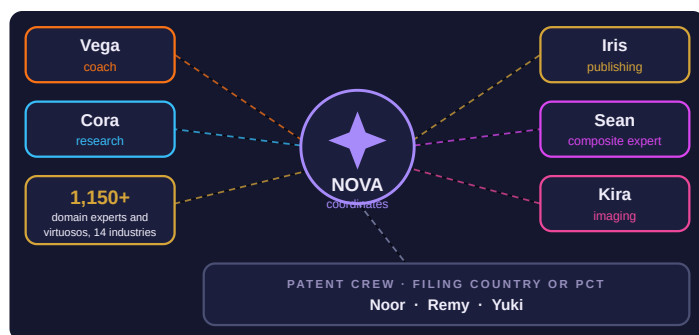

The finished pack, carrying the whole record.

WHAT IT DOES TODAY

- **Brainstorm ideas, problems and solutions**
- **Refine an idea into an invention**
- **Describe how it looks and how it functions**
- **Find the valuable invention, and whether a patent or a trade secret protects it best**
- **Visualize it: 2D, in use, 3D models and short videos**
- **Generate the patent application, PCT or your country**
- **Delivered through a local, branded portal in each market**

NEXT Education offerings and research grants

FORGE is proprietary to IPGuru: you approve the evidence at every gate, and a weak Grade loops the work back. For a small company this is continuous: nine projects across five seats over three years is what product improvement looks like.

Nova coordinates the crew on every project, live today.

THE CREW BEHIND NOVA

1,150+ specialist agents

789 domain experts across 14 industries, so the invention is understood in its own field

355 professional virtuosos for the crafts every project needs: writing, figures, modelling, examination

A patent crew per jurisdiction, drafting and mock-examining for your filing country

WHY NOT JUST USE CHATGPT OR CLAUDE?

IPGuru is a chatbot too. The difference is what comes back: a documented, examinable file.

A proprietary method

Five gated FORGE phases, one scorecard, every time.

Measured quality

300 scored templates and a mock examination.

Embedded prior-art search

250M+ patents searched semantically, five languages translated.

Consistent visuals

One identity from concept art to figures, 3D and video.

Refine and test

Patentability, feasibility and the competitive landscape.

A finished pack

Drafted for your jurisdiction, bound for your attorney.

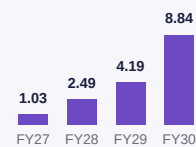

HOW IT MAKES MONEY

Free to brainstorm and explore. Membership unlocks features and raises limits.
Pay to turn refined ideas into patent applications.

FREE US\$0 Brainstorming, idea capture, first concept images. Unlimited, no credit card required.	MEMBERSHIP US\$9–36/mo Unlocks validation: market, competitors, prior art and patentability. Membership drives ARR.	PROJECT US\$399–999 One time. Deep search, mock examination and the finished pack.	INSTITUTIONS US\$45k/yr Site licence for faculty, students and alumni. Their cloud or ours.
--	---	---	--

THE SECOND ENGINE

Innovation can be taught. Universities and reskilling programmes license the curriculum.

Education revenue, US\$M

Annual licences

Renewed by the institution, not the individual, and sold once to serve thousands of users. The part of the company that behaves like enterprise software.

Cohorts convert

Learners graduate into the platform with ideas to protect. A second business that also feeds the first.

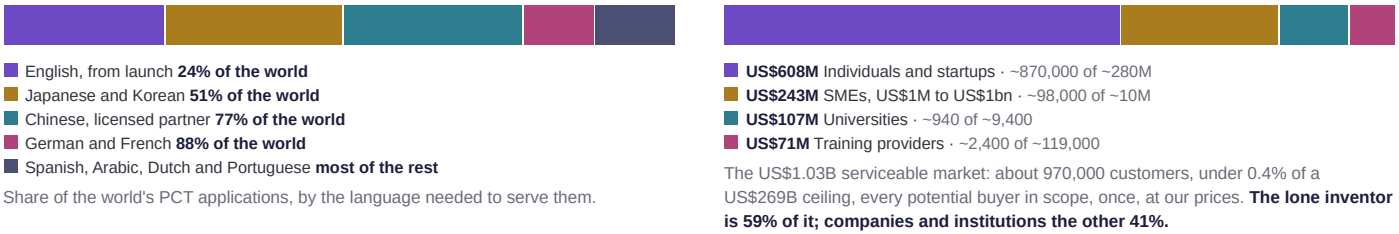

Skills funding

Learners pay with national programmes: SkillsFuture, Skill India, Australian RTO subsidies, WIOA and employer budgets.

WHAT THIS ROUND FUNDS

Ten countries file 88% of the world's patents. Language is what unlocks them.

English from launch reaches a quarter of the world's filings. Japanese and Korean double that, a licensed partner opens China, and German and French take it to 88%. Spanish, with a billion speakers, then Arabic, Dutch and Portuguese open most of the rest, because a mission to unlock inventors everywhere cannot stop at English. **The round funds the United States launch and that language programme**, on one platform where a new market is a configuration, not a rebuild.

Sep 2026 Singapore, global PCT	Dec 2026 India	Jan 2027 Australia	Feb 2027 USA	2027 Japan, Korea, UK and Europe	2028 Chinese, German, French and Spanish blocs
-----------------------------------	-------------------	-----------------------	-----------------	-------------------------------------	---

We are not competing with patent attorneys. We do the work that has to happen before an attorney is any use, for people who would mostly never have reached one, and those who can go self-service do. **The goal is to grow the underserved part of the market, not to redistribute the part already served.**

INNOVATION SHOULD BE FOR EVERYONE

Christopher Jackson
FOUNDER & CEO
35+ years of enterprise data and AI. Built the platform. Patents filed in AI governance.

Steve Mays
VP ENGINEERING
Ex-AWS, colleague since 2014 at Teradata Singapore. Infrastructure, billing, filing.

Jayesh Thakur
VP CUSTOMER SUCCESS
Colleague since 2018 at Teradata Indonesia. Customer success, support, SOC 2.
